Production specification - mixed job report

1 physical sheets / 1 distinct layouts (duplex counted once)

Stock 0.111855 m2 / usable 0.101593 m2

Unioned material 0.079733 m2 / yield 71.283%

Roll label-web: used length 508.43 mm

Not proven optimal: roll 508.43 mm against a lower bound of 483.45 mm: within 24.98 mm (5.2 %).

Waste 0.032121 m2 / reusable remainder 0.000000 m2

Exact polygon remainder: stock material minus every die footprint (knife plus bleed and required-mark clearance), without webs narrower than 20 mm. Stock inventory records the same polygons as remnants.

Run rule length: kind / gross / unique / shared (metres)
